

The German Childhood Cancer Registry (DKKR) at the Institute of Medical Biostatistics, Epidemiology and Informatics (IMBEI) of the University Medical Center Mainz in coordination with the Ministry of Social Affairs, Labor, Health and Demography, Rhineland-Palatinate is looking for

a Scientific Manager for the German Registry of Childhood Cancer (DKKR)

starting 01.01.2020 (or earlier) as the successor for PD Dr. Kaatsch

Reference Number 5006-3114

This is a permanent, full-time position.

Your tasks:

- Management of the DKKR (at present 11 full-time equivalents)
- Organisation and leadership, budget responsibility
- Strategic and professional development of the DKKR
- Initiation and implementation of research projects with data from the DKKR
- Publication of analyses and presentation of DKKR data at conferences
- Close collaboration with the treating physicians and the Society for Paediatric Oncology and Haematology (GPOH)
- Cooperation with the regional cancer registries of the German states
- Collaboration with the scientists at the IMBEI and the University Medical Center Mainz
- Cooperation with European and international institutions and initiatives

Your profile:

- Completed scientific university degree and PhD
- Experience in the field of oncology or cancer epidemiology, with preference for paediatric oncology
- Experience in healthcare management, disease registries and the comprehensive analysis of registry data as well as experience in IT are desired
- Experience managing employees; ability to communicate and work in a team well

We can offer you:

- Work in an interdisciplinary, committed and collegial research team
- An opportunity to complete a Habilitation (post-doctoral qualification)
- Remuneration in accordance with the collective agreement pursuant to your qualification level as well as a pension plan and social benefits
- Childcare options, depending on availability
- Transit ticket and excellent transportation connections

The Institute of Medical Biostatistics, Epidemiology and Informatics (IMBEI) of the University Medical Center Mainz carries out numerous long-term research projects funded by the EU Commission, the German Research Foundation, German Cancer Aid and the Federal Ministry of Education and Research. The IMBEI offers a dynamic and interdisciplinary teaching and research environment in a large institute with about 100 employees. There are extensive possibilities for personal and professional development.

The University Medical Center of the Johannes Gutenberg University is committed to equal opportunities for women and therefore calls in particular women interested in science to apply. Remuneration will be paid in accordance with TV-L from the relevant remuneration group, in accordance with the personal and collectively agreed conditions. If suitably qualified, severely disabled people will be given preference. Information about this position is available from Prof. Dr. Singer, acting director of IMBEI.

deadline for application: 01.09.2019
